Lucrare de Laborator #3

1 Scopul lucrarii de laborator

Realizeaza un simplu GUI calculator care suporta urmatoare functii: +, -, /, *, putere, radical, InversareSemn(+/-), operatii cu numere zecimale.

2 Obiective

1. Realizeaza un simplu GUI Calculator.
2. Operatiile simple: +,-,*,/,putere,radical,InversareSemn(+/-),operatii cu numere zecimale.
3. Divizare proiectului in doua module - Interfata grafica(Modul GUI) si Modulul de baza(Core Module).

4 Concluzie

Efectuind aceasta lucrare de la borator am folosit IDE Visual Studio unde am realizat un simplu GUI calculator care suporta functiile +,-,/,*, radacina patrata dintrun numar , ridicarea la putere si schimbarea semnului in limbajul de programare C Sharp.
